31-35 students	\$3,900
36 or more students	\$4,500

Notes

- The minimum enrollment for any program is five students.
- The summer salary amounts above assume that all students in the program are enrolled in two courses each; programs where students take one course will have the salary amount for teaching cut in half.
- The wintersession salary amounts above assume that all students in the program are enrolled in one course each.
- The money for the salaries comes from the tuition that students pay, not the program fee. The amounts for salaries should not be included in the program fee or on the budget template.
